Bunge Limited (www.bunge.com, NYSE: BG) is a leading global agribusiness and food company operating in over 40 countries with approximately 23,000 employees. The decrease in the number of employees from previous years is primarily related to the formation of the BP Bunge Bioenergia joint venture in December 2019, to which we contributed our Brazilian sugar and bioenergy operations.

Bunge buys, sells, stores and transports oilseeds and grains to serve customers worldwide; processes oilseeds to make protein meal for animal feed and edible oil products for commercial customers and consumers; mills wheat, corn and rice to make ingredients used by food companies; and sells fertilizer in South America. The company is now headquartered in St. Louis, Missouri, and celebrated its 200th anniversary in 2018.

(F0.2) State the start and end date of the year for which you are reporting data.

(F0.5) Are there any parts of your direct operations or supply chain that are not included in your disclosure?

No
F1.1 How does your organization produce, use or sell your disclosed commodity(ies)?

Palm oil

**Activity**
- Refining & processing
- Exporting/trading

**Form of commodity**
- Crude palm oil (CPO)
- Crude palm kernel oil (CPKO)
- Refined palm oil
- Palm biodiesel

**Source**
- Trader/broker/commodity market

**Country/Area of origin**
- Brazil
- Cambodia
- Colombia
- Costa Rica
- Côte d'Ivoire
- Guatemala
- Honduras
- India
- Indonesia
- Malaysia
- Mexico
- Panama
- Thailand

**% of procurement spend**
- 1-5%

**Comment**
Figure includes the operations run by subsidiary Bunge Loders Croklaan.

Soy

**Activity**
- Crushing
- Refining & processing
- Refining & fractionation
- Exporting/trading

**Form of commodity**
- Whole soy beans
- Soy bean oil
- Soy bean meal
- Soy derivatives
- Soy biodiesel

**Source**
- Smallholders
- Multiple contracted producers
- Trader/broker/commodity market

**Country/Area of origin**
- Argentina
- Brazil
- Canada
- France
- Paraguay
- Spain
- Ukraine
- United States of America

**% of procurement spend**
- 61-70%

**Comment**
Our Agribusiness segment is an integrated, global business involved in the purchase, storage, transport, processing and sale of agricultural commodities and commodity products while managing risk across various product lines. The principal agricultural commodities that we handle in this segment are oilseeds, primarily soybeans, rapeseed, canola and sunflower seed, and grains, primarily wheat and corn. We process oilseeds into vegetable oils and protein meals, principally for the food, animal feed and biodiesel industries, through a global network of facilities.
(F1.2) Indicate the percentage of your organization’s revenue that was dependent on your disclosed forest risk commodity(ies) in the reporting year.

<table>
<thead>
<tr>

**Soy**: Soy origination from multiple regions in Argentina. Salta, Tucuman and Chaco are important to be considered for soy expansion in that country. Due to commercial sensitivity of confidential information, with competitiveness implications, percentages of sourcing from each of Argentinian provinces are not disclosed. Through our non-deforestation policy and our disclosure, we are monitoring 100% of our direct sourcing volumes in those regions, and the volume of the region represents 10% of the country origination. For more information visit https://www.bunge.com/sustainability/non-deforestation

**Bunge operates in all producing states of Brazil. Regions facing higher risk of deforestation are monitored as stated within our non deforestation policy, and we are already reaching 96% of monitoring to direct sourcing in these regions, and 30% for the indirect sourcing through third parties. Due to commercial sensitivity of information, with competitiveness implications, percentage of sourcing from each of Brazilian states is not disclosed. The company provides traceability information that may reach to the farm level directly to customers, under confidentiality agreement and commercial services contracted. Currently, 45% of Brazilian beans for Bunge in Brazil are sourced from Cerrado Biome, being 23% of the volume from areas considered subject to expansion of agriculture. Sourcing from other Brazilian biomes are not subject to deforestation, due to ancient agriculture (South of the country) or sectorial commitments in place (Amazon Moratorium). More information public available can be found at [CDP](https://www.bunge.com/sustainability/non-deforestation)
Forest risk commodity
- Soy

Country/Area of origin
- Paraguay

State or equivalent jurisdiction
- Specify state/equivalent jurisdiction (Atlantic biome)

% of total production/consumption volume
- 100

Please explain
- The company does not source beans from the Paraguayan Chaco and all the volume sourced in the country is subject to the governmental moratorium.

Forest risk commodity
- Soy

Country/Area of origin
- Any other countries/areas

State or equivalent jurisdiction
- <Not Applicable>

% of total production/consumption volume
- 100

Please explain
- 100% of remainder origination of soy are from areas not related to deforestation, such as the U.S.A., Canada and Ukraine

F1.5e

(F1.5e) How does your organization produce or consume biofuel derived from palm oil?

Does your organization produce or consume biofuel derived from palm oil?
- Yes

Data type
- Production

Volume produced/consumed
- 110000 Metric

Other, please specify (metric ton)

Country/Area of origin
- Malaysia

State or equivalent jurisdiction
- Not disclosing

% of total production/consumption volume
- 6-10%

Does the source of your organization's biofuel material come from smallholders?
- Yes

Comment

F1.6

(F1.6) Has your organization experienced any detrimental forests-related impacts?

Yes

F1.6a
(F1.6a) Describe the forests-related detrimental impacts experienced by your organization, your response, and the total financial impact.

**Forest risk commodity**
Soy

**Impact driver type**
Reputational and markets

**Primary impact driver**
Shifts in consumer preference

**Primary impact**
Constraint to growth

**Description of impact**
Implementation of Soybean Moratorium in the Amazon Biome due to customers concern. Although this is a historical event (2006) it limited the growth of crops in the Biome.

**Primary response**
Establishment of new no-deforestation/no-conversion commitments

**Total financial impact**
1000

**Description of response**
The Amazon Soy Moratorium remains to present time and does not represent significant loss due to the non expansion of local market that, in fact, has grown over areas already open.

**Forest risk commodity**
Soy

**Impact driver type**
Reputational and markets

**Primary impact driver**
Increased stakeholder concern or negative stakeholder feedback

**Primary impact**
Other, please specify (NGOs pressure on stakeholders)

**Description of impact**
Company was asked to produce a report to present progress and further explanation on the pace of non-deforestation policy implementation.

**Primary response**
Engagement with suppliers

**Total financial impact**
10000

**Description of response**
The report was generated and well received by stakeholders, and is available at: https://www.bunge.com/sites/default/files/2021_non_deforestation_report.pdf Figures show that the company remains ahead of its main peers delivering results in the shortest deadline of the market.

---

**F2. Procedures**

**F2.1**

(F2.1) Does your organization undertake a forests-related risk assessment?
Yes, forests-related risks are assessed

---

CDP
(F2.1a) Select the options that best describe your procedures for identifying and assessing forests-related risks.

**Palm oil**

- **Value chain stage**: Supply chain
- **Coverage**: Full
- **Risk assessment procedure**: Assessed as part of an established enterprise risk management framework
- **Frequency of assessment**: More than once a year
- **How far into the future are risks considered?**: 1 to 3 years
- **Tools and methods used**
  - Internal company methods
  - External consultants
  - Global Forest Watch Pro
  - National specific tools and databases

**Please explain**

Bunge applies multiple tools to assess risks related to deforestation in palm, and such assessments support the company strategy and implementation plans. The results of these are disclosed periodically as well as major projects and traceability data. More info at http://northamerica.bungeloders.com/taking-responsibility/palm-oil-dashboard/

**Soy**

- **Value chain stage**: Supply chain
- **Coverage**: Full
- **Risk assessment procedure**: Assessed as part of an established enterprise risk management framework
- **Frequency of assessment**: More than once a year
- **How far into the future are risks considered?**: 1 to 3 years
- **Tools and methods used**
  - Internal company methods
  - External consultants
  - Global Forest Watch Pro
  - National specific tools and databases

**Please explain**

The company assesses risks related to deforestation in its supply chain and discloses results periodically to its stakeholders. The company also engages in multiple platforms and forums and has implemented a traceability model to monitor suppliers in zones facing higher risk of deforestation. More info at https://www.bunge.com/sustainability/non-deforestation

(F2.1b) Which of the following issues are considered in your organization's forests-related risk assessment(s)?

**Availability of forest risk commodities**

**Relevance & inclusion**: Relevant, always included

**Please explain**

The company has mapped areas under risk of deforestation and checks the availability of deforestation-free commodities in its supply chain.

**Quality of forest risk commodities**

**Relevance & inclusion**: Relevant, always included

**Please explain**

The company analyzes availability of commodities purchased based on quality standards.

**Impact of activity on the status of ecosystems and habitats**

**Relevance & inclusion**: Relevant, always included

**Please explain**

Ecosystems and habitats under possible impact are considered by the company when developing its risk assessment in the operations.
Regulation

Relevance & inclusion
Relevant, always included

Please explain
Regulations are considered. Bunge includes legal checks and contract assurances in relevant areas.

Climate change

Relevance & inclusion
Relevant, always included

Please explain
Adverse weather conditions have historically caused crop failures or significantly reduced harvests, resulting in supply and price volatility that can impact our operating results. The company manages risk to climate through diversification of supply, research and analysis, and direct engagement on the ground with producers.

Impact on water security

Relevance & inclusion
Not relevant, included

Please explain
The potential physical impacts of climate change are uncertain and may vary by region. These potential effects could include changes in rainfall patterns, water shortages, changing sea levels, changing storm patterns and intensities, and changing temperature levels that could adversely impact our costs and business operations, the location, costs and competitiveness of global agricultural commodity production and related storage and processing facilities and the supply and demand for agricultural commodities. These effects could be material to our results of operations, liquidity or capital resources. It is known that deforestation could affect the climate and, thus, impact on water security. The company has a non deforestation policy in place and is monitoring its supply chain where deforestation could happen. The intention is to diminish its occurrence and become deforestation-free by 2025.

Tariffs or price increases

Relevance & inclusion
Not relevant, explanation provided

Please explain
Tariffs in agriculture are not related to deforestation. From time to time depending on market conditions, increases in prices for, among other things, food, fuel and crop inputs, such as fertilizers, may become the subject of significant discussion by governmental bodies and the public throughout the world. In some countries, this has led to the imposition of policies such as price controls, tariffs and export restrictions on agricultural commodities. Although potentially material, there is no tariff and price increase due to deforestation risk.

Loss of markets

Relevance & inclusion
Relevant, always included

Please explain
Although it has not caused impacts to date, loss of market or "license to operate" due to deforestation concerns among stakeholders is considered in Bunge's commercial decisions and strategic planning.

Leakage markets

Relevance & inclusion
Relevant, always included

Please explain
We do not support the leakage market but our sourcing decisions may direct certain CPO producers to look for alternative, leakage, markets. We continue to monitor these companies and apply pressure where possible / relevant to help these companies adopt sustainable practices. At the same time we support initiatives to transform leakage markets into markets that work with sustainable standards.

Brand damage related to forest risk commodities

Relevance & inclusion
Relevant, always included

Please explain
Corporate reputation, and the potential impact on customer and stakeholder relations, is carefully considered. Bunge's policies, transparency and disclosure represent proactive steps to manage any potential risks.

Corruption

Relevance & inclusion
Not relevant, included

Please explain

Social impacts

Relevance & inclusion
Relevant, always included

Please explain
Bunge has a strong presence in developing economies and regions. It applies a transparent, shared value approach in these areas, and has multiple initiatives in place to support positive social impact, in addition to the inherent economic benefits of our operations. More info available at https://www.bunge.com/sustainability/partnerships-and-projects.
Other, please specify
Relevance & inclusion
Please explain

F2.1c
Which of the following stakeholders are considered in your organization’s forests-related risk assessments?

Customers

Relevance & inclusion
Relevant, always included

Please explain
Bunge considers the demands and specifications of its customers when assessing forest-related risks in its supply. The company has developed a self-certification scheme for soy and also certifies soy and palm products according to customer demand.

Employees

Relevance & inclusion
Relevant, always included

Please explain
Bunge posts relevant policies publicly and in employee policy manuals. Policy training, awareness activities and other outreach are conducted regularly. Teams must serve as communication channels with suppliers and customers.

Investors

Relevance & inclusion
Relevant, always included

Please explain
As a public company, investor demands are considered carefully. The company considers investor input as material, and engages with investors on the topic of deforestation both proactively and responsively.

Local communities

Relevance & inclusion
Relevant, always included

Please explain
The company considers that, in some geographies, local communities might be impacted due to land use change. The company has clear policies regarding land and human rights and engages its supply chain to ensure compliance and respect for local communities.

NGOs

Relevance & inclusion
Relevant, always included

Please explain
NGOs can be good partners to fight deforestation in the supply chain. Where material, we engage in projects with NGOs to create solutions. We also engage with local communities, growers and governments. Bunge maintains active engagement and communication with campaigning and critical NGOs as well, to ensure we understand multiple perspectives and to help inform outside stakeholders about industry facts.

Other forest risk commodity users/produces at a local level

Relevance & inclusion
Relevant, always included

Please explain
The company has always promoted an open dialogue with farmers and works with them at a local level. We engage with farmers to help them with legal compliance, promote best practices and to meet market demands that require voluntary commitment.

Regulators

Relevance & inclusion
Relevant, always included

Please explain
We are subject to a variety of laws in each of the countries in which we operate which govern various aspects of our business, including the processing, handling, storage, transport and sale of our products; risk management activities; land-use and ownership of land, including laws regulating the acquisition or leasing of rural properties by certain entities and individuals.

Suppliers

Relevance & inclusion
Relevant, always included

Please explain
We incorporate a commitment to sustainability into many of the areas of our business; from how we plan and develop our strategic goals and operate our facilities, to how we do business with our suppliers and customers and engage with our communities.

Other stakeholders, please specify

Relevance & inclusion
Relevant, always included

Please explain
Governments: governments have authority to allocate land to local communities, set new labor standards based on internationally accepted best practices etc.
F3.1

(F3.1) Have you identified any inherent forests-related risks with the potential to have a substantive financial or strategic impact on your business?

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Risk identified?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Timber products</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
<tr>
<td>Palm oil</td>
<td>Yes</td>
</tr>
<tr>
<td>Cattle products</td>
<td>&lt;Not Applicable&gt;</td>

<tr>
<td>Other - Rubber</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
<tr>
<td>Other - Cocoa</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
<tr>
<td>Other - Coffee</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
</tbody>
</table>

F3.1a

(F3.1a) How does your organization define substantive financial or strategic impact on your business?

The substantive impact is one that relates to potential loss of customer demand for our products or the ability to source products at volumes sufficient to meet demand.

F3.1b

(F3.1b) For your disclosed forest risk commodity(ies), provide details of risks identified with the potential to have a substantive financial or strategic impact on your business, and your response to those risks.

- **Forest risk commodity**
  - Palm oil

- **Type of risk**
  - Physical

- **Geographical scale**
  - Plantation

- **Where in your value chain does the risk driver occur?**
  - Supply chain

- **Primary risk driver**
  - Increased ecosystem vulnerability

- **Primary potential impact**
  - Supply chain disruption

- **Company-specific description**
  - Palm originated in areas under severe impact on endangered ecosystems are subject to discontinuity in sourcing.

- **Timeframe**
  - 1-3 years

- **Magnitude of potential impact**
  - Low

- **Likelihood**
  - About as likely as not

- **Are you able to provide a potential financial impact figure?**
  - Yes, an estimated range

- **Potential financial impact (currency)**
  - <Not Applicable>

- **Potential financial impact figure - minimum (currency)**
  - 10000

- **Potential financial impact figure - maximum (currency)**
  - 200000

- **Explanation of financial**
  - Supply from such areas could be ineligible for sourcing in accordance with Bunge's policy. We are not dependent on specific areas for our palm supply.

- **Primary response to risk**
  - Engagement with suppliers

- **Description of response**
  - Bunge maintains high traceability levels, and monitors risky areas.

- **Cost of response**
  - It refers to approximate monitoring costs to avoid development of suppliers in risky areas.
Forest risk commodity
Soy

Type of risk
Reputational and markets

Geographical scale
Farm

Where in your value chain does the risk driver occur?
Supply chain

Primary risk driver
Increased stakeholder concern or negative stakeholder feedback

Primary potential impact
Constraint to growth

Company-specific description
As the company sources from a multitude of farmers and third parties, there is the risk that some of them could engage in deforestation practices. Scrutiny or adverse reaction from customers or stakeholders could result in reduced demand for our products.

Timeframe
1-3 years

Magnitude of potential impact
Low

Likelihood
More likely than not

Are you able to provide a potential financial impact figure?
Yes, an estimated range

Potential financial impact (currency)
<Not Applicable>

Potential financial impact figure - minimum (currency)
20000

Potential financial impact figure - maximum (currency)
200000

Explanation of financial
Due to the diversity of our supply chain, figures related to loss of net income due to specific farmers are not relevant.

Primary response to risk
Tighter supplier performance standards

Description of response
The company has increased traceability activities in areas subject to risks related to deforestation and maps non-compliance. Furthermore, the company now has expanded its standards to indirect sourcing and that now shall cover the remainder of the sourcing from risk areas under compliance.

Cost of response
80000

Explanation of cost of response
Cost is approximate and is related to monitoring and engagement activities in place by Bunge and the expansion of activities to the indirect sourcing in applicable regions.

F3.2

(F3.2) Have you identified any forests-related opportunities with the potential to have a substantive financial or strategic impact on your business?

<table>
<thead>
<tr>

F3.2a
For your selected forest risk commodity(ies), provide details of the identified opportunities with the potential to have a substantive financial or strategic impact on your business.

**Forest risk commodity**
Palm oil

**Type of opportunity**
Products & services

**Where in your value chain does the opportunity occur?**
Supply chain

**Primary forests-related opportunity**
Increased security of production

**Company-specific description & strategy to realize opportunity**
Capture value in the market due to certification demanded by customers, reforestation and conservation projects in collaboration with supplier/buyer

**Estimated timeframe for realization**
Current - up to 1 year

**Magnitude of potential impact**
Medium-low

**Likelihood**
Virtually certain

**Are you able to provide a potential financial impact figure?**
Yes, an estimated range

**Potential financial impact figure (currency)**
<Not Applicable>

**Potential financial impact figure – minimum (currency)**
50000

**Potential financial impact figure – maximum (currency)**
1000000

**Explanation of financial impact figure**
Figures are approximate. Refers to differential due to certification of palm products, size of the project

---

**Forest risk commodity**
Soy

**Type of opportunity**
Products & services

**Where in your value chain does the opportunity occur?**
Direct operation
Supply chain

**Primary forests-related opportunity**
Increased brand value

**Company-specific description & strategy to realize opportunity**
Delivery of soybeans certified for biofuel purposes into the European Market (EU Directive) and other markets

**Estimated timeframe for realization**
Current - up to 1 year

**Magnitude of potential impact**
Medium-high

**Likelihood**
Virtually certain

**Are you able to provide a potential financial impact figure?**
Yes, a single figure estimate

**Potential financial impact figure (currency)**
4000000

**Potential financial impact figure – minimum (currency)**
<Not Applicable>

**Potential financial impact figure – maximum (currency)**
<Not Applicable>

**Explanation of financial impact figure**
Soybeans being sold to biofuel market is a very important segment in soybean industry and already represents an important share of the soybean oil market, globally. There are several certification schemes in place and, as the commodity is primarily and mostly not associated with new deforestation, the majority of soybean originated globally is certifiable. The company also implements unique governance systems to provide verifiable beans as a transition to fully certified beans, as customers needs evolve.
F4.1

(F4.1) Is there board-level oversight of forests-related issues within your organization?

Yes

F4.1a

Bunge’s Grains & Oilsseeds Commitment reflects our belief in sustainable value chains for major commodities such as soy, the world’s second-most used oil. In particular, we commit to: achieve deforestation-free supply worldwide between 2020-2025, considering both direct and indirect sourcing and encompasses native vegetation conversion in the appropriate geographies, reconciling production with environmental, economic and social interests. We commit to employ science-based definitions and cutoff dates for deforestation determined by credible multi-stakeholder processes, apply these criteria to our supply chains, in addition to minimum standards of legal compliance, respect human rights and indigenous community rights, and apply free, prior and informed consent for land purchases and use, enhance traceability to farm and transparency overall, ensure respect for legally protected areas, publicly disclose progress on our efforts, engage in open and productive dialogue with stakeholders. We publish bi-annual reports on traceability and impact related out our grains & oilseeds value chain.

F4.6

(F4.6) Has your organization made a public commitment to reduce or remove deforestation and/or forest degradation from its direct operations and/or supply chain?
Yes
grains_and_oilseeds_commitment_2021.pdf
(F4.6a) Has your organization endorsed any of the following initiatives as part of its public commitment to reduce or remove deforestation and/or forest degradation?

Soy Moratorium

Other, please specify (RSPO, RTRS, SOFT COMMODITIES FORUM)

(F4.6b) Provide details on your public commitment(s), including the description of specific criteria, coverage, and actions.

**Forest risk commodity**

**Palm oil**

**Criteria**

- No new development on peat regardless of depth
- Avoidance of negative impacts on threatened and protected species and habitats
- No land clearance by burning or clearcutting
- No conversion of High Conservation Value areas
- No conversion of High Carbon Stock forests
- Secure Free, Prior and Informed Consent (FPIC) of indigenous people and local communities
- Promotion of gender equality and women’s empowerment
- Adoption of the UN International Labour Organization principles
- Resolution of complaints and conflicts through an open, transparent and consultative process
- Facilitate the inclusion of smallholders into the supply chain
- No sourcing of illegally produced and/or traded forest risk commodities

**Operational coverage**

Direct operations and supply chain

**% of total production/consumption covered by commitment**

100%

**Cutoff date**

2017

**Commitment target date**

2017

Please explain

Bunge is committed to sustainable sourcing of palm oil. Please read our full policy at www.bunge.com/sustainability. The company is also an active member of RSPO.

**Forest risk commodity**

**Soy**

**Criteria**

- No conversion of natural ecosystems
- Zero gross deforestation/ no deforestation
- Avoidance of negative impacts on threatened and protected species and habitats
- No land clearance by burning or clearcutting
- Secure Free, Prior and Informed Consent (FPIC) of indigenous people and local communities
- Resolution of complaints and conflicts through an open, transparent and consultative process
- No sourcing of illegally produced and/or traded forest risk commodities
- Recognition of legal and customary land tenure rights

**Operational coverage**

Direct operations and supply chain

**% of total production/consumption covered by commitment**

100%

**Cutoff date**

Not applicable

**Commitment target date**

2021-25

Please explain

Please read about our full commitment regarding Non Deforestation Policy at https://www.bunge.com/sustainability/non-deforestation. Bunge is also a member of the Soybean Moratorium of the Brazilian Amazon, a participant of the Cerrado Working Group, and the Soft Commodities Forum.

Providing information on appropriate actions that can be taken to address non-compliance
Assessing the efficacy and efforts of non-compliant supplier actions through consistent and quantified metrics
Re-integrating suppliers back into supply chain based on the successful and verifiable completion of activities

Please explain
The procedure is established to analyze causes of the problem and engagement possibility. A comprehensive flow of the grievance process is publicly available at http://northamerica.bungeloders.com/images/applications/Bunge_Grievance_Process_Flow.pdf

Forest risk commodity
Soy
Operational coverage
Direct operations
Supply chain

Description of control systems
We monitor our suppliers to assess adherence to our commitment to be deforestation free by 2025. We collect proprietary information from the farm level (CAR/GPS coordinate) to connect it to the right grower. All analysis applies over regions in S.America considered as areas under risk for deforestation. Currently monitoring covers over 12 million hectares of farmland and continuously expands its scope. The monitoring has considered elements from traceability analysis to farm (direct and indirect sourcing) and is based on satellite imagery analysis by a 3rd party plus on site visit. Biannual progress reports are presented publicly, bringing a large scope of relevant quantitative and qualitative metrics on the value chain. Grievance process is part of regular Bunge's grievance mechanism available at the website and other channels. More information about strategic implementation of the policy is available at https://www.bunge.com/sustainability/non-deforestation.

Monitoring and verification approach
Geospatial monitoring tool
Ground-based monitoring system
Third-party verification

% of total volume in compliance
91-99%

% of total suppliers in compliance
91-99%

Response to supplier non-compliance
Retain & engage
Suspend & engage
Exclude

Procedures to address and resolve non-compliance with suppliers
Providing information on appropriate actions that can be taken to address non-compliance
Assessing the efficacy and efforts of non-compliant supplier actions through consistent and quantified metrics
Re-integrating suppliers back into supply chain based on the successful and verifiable completion of activities

Please explain
We annually map and monitor direct sourcing suppliers (over 96% already reached in applicable areas) as well indirect suppliers (30% reached in applicable areas) and have mapped 100% of indirect sourcing elevators in South America, for areas subject to deforestation risk in the Cerrado and Chaco biomes. Monitoring may happen more than once per season in case deforestation is checked. Our satellite monitoring maps farms boundaries so we can trace back and check on the ground in the case that engagement is needed. Our response to deforestation in the supply will depend of scale of the problem, causes and application of protocols (Ibama embargo, Amazonian Soy Moratorium, Non deforestation Policy implementation in the case of Cerrado and Chaco biomes). Actions for non compliance may be from immediate exclusion of suppliers to retaining and engagement, depending on severity of cases. For most confirmed cases, at least suspension then engagement applies. Objective is to be deforestation free by 2025. Third part suppliers have been fully mapped and are in phase of engagement, aiming at replicating our policy. Information about our strategic approach, partnerships, metrics and incentives in place are available at https://www.bunge.com/sustainability/responsible-supply-chains.

F6.5
(F6.5) For your disclosed commodity(ies), indicate if you collect data regarding your own compliance and/or the compliance of your suppliers with the Brazilian Forest Code.

<td>Supply chain mapping</td>
<td>Capacity building</td>
<td></td>
<td>To implement best practice: • We conducted a mill prioritization process, and a series of mill assessments in Peninsular Malaysia and Sabah in collaboration with Proforest which informed content of supplier workshops. An example of implementation of best practices are passport return programs at mill level. • We are implementing a timebound transformation plan (ARTP) for our Pasir Gudang refinery in collaboration with TFT and Proforest, that includes deep and broad engagement with its supply base. Focus points are deforestation and labor, specifically ethical recruitment and wages. • We continue to work with our suppliers to ensure they become compliant with “No new development on peatlands regardless of depth” and implementation of Best Management Practices (BMP) for existing plantations on peat” through workshops called the Peatland Roadshow. For this we collaborate with the Global Environment Centre (GEC). More information available at <a href="http://europe.bungeloders.com/taking-responsibility/sustainable-sourcing/">http://europe.bungeloders.com/taking-responsibility/sustainable-sourcing/</a></td>

Involved in multi-partnership or stakeholder initiatives

**Initiatives**

UN Global Compact  
Roundtable on Sustainable Biomaterials (RSB)  
Roundtable on Sustainable Palm Oil (RSPO)  
International Sustainability & Carbon Certification (ISCC)  
European Palm Oil Alliance (EPOA)  
Palm Oil Transparency Coalition (POTC)

**Jurisdictional approaches**

<Not Applicable>

**Please explain**

Bunge is an active member of RSPO and annually reports progress through RSPO Acop. Bunge sits on the Palm Oil Collaboration Working Group

**Forest risk commodity**

**Palm oil**

**Do you participate in activities/initiatives?**

Yes

**Activities**

Engaging with non-governmental organizations

**Initiatives**

<Not Applicable>

**Jurisdictional approaches**

<Not Applicable>
Please explain
We are committed to sourcing and processing traceable and certified sustainable palm oil. We are concerned by deforestation, loss of biodiversity, and the use of peat lands, all issues associated with palm oil production on plantations. We work with the RSPO, our suppliers, our customers, and NGOs to assess how we can improve on RSPO’s existing principles and criteria addressing these and other emerging issues.

Please explain

F7. Verification

F7.1

(F7.1) Do you verify any forests information reported in your CDP disclosure?
Yes

F7.1a
(F7.1a) Which data points within your CDP disclosure have been verified, and which standards were used?

**Disclosure module**
F6. Implementation

**Data points verified**
Certified production

**Verification standard**
RSPO 2BsVs RTRS ISCC

**Please explain**
The figures presented in the certification volumes are those certified and, thus, verified by a 3rd party auditing.

---

**Disclosure module**
F6. Implementation

**Data points verified**
Palm oil traceability levels

**Verification standard**
No standard applicable

**Please explain**
Traceability to mill and to farm in palm business is verified by a third party auditor.

---

**Disclosure module**
F6. Implementation

**Data points verified**
Monitoring levels for soy

**Verification standard**
Not applicable

**Please explain**
Monitoring levels for direct and indirect sourcing are verified / audited by a 3rd party.

---

F8. Barriers and challenges

---

F8.1
(F8.1) Describe the key barriers or challenges to eliminating deforestation and/or conversion of other natural ecosystems from your direct operations or from other parts of your value chain.

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Palm oil</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coverage</td>
<td>Supply chain</td>
</tr>
<tr>
<td>Primary barrier/challenge type</td>
<td>Supply chain complexity</td>
</tr>
<tr>
<td>Comment</td>
<td>The palm supply chain is extremely complex and many buyers consider palm oil a commodity with high focus on competitive pricing, supply chain efficiencies. Sourcing from multiple suppliers and regions makes it difficult to achieve full traceability to plantation and to monitor all suppliers: direct and indirect</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Palm oil</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coverage</td>
<td>Supply chain</td>
</tr>
<tr>
<td>Primary barrier/challenge type</td>
<td>Land tenure and insecure property rights issues in sourcing regions</td>
</tr>
<tr>
<td>Comment</td>
<td>Governments have authority to allocate land, provide land titles. Deforestation is not a single commodity issue/challenge. Deforestation must be addressed at landscape level with all stakeholders involved, especially the government.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Palm oil</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coverage</td>
<td>Supply chain</td>
</tr>
<tr>
<td>Primary barrier/challenge type</td>
<td>Limited availability of certified materials</td>
</tr>
<tr>
<td>Comment</td>
<td>Demand for certified material is increasing resulting in increased prices for specific palm (kernel) oil fractions</td>
</tr>
</tbody>
</table>

F8.2
Describe the main measures that would improve your organization’s ability to manage its exposure to deforestation and/or conversion of other natural ecosystems.

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Palm oil</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Coverage</strong></td>
<td>Supply chain</td>
</tr>
<tr>
<td><strong>Main measure</strong></td>
<td>Increased demand for certified products</td>
</tr>
<tr>
<td><strong>Comment</strong></td>
<td>make certified palm the norm. This would create level playing field for buyers, stimulate production of certified palm and reduce the excess of initiatives that basically try to achieve same thing but creates additional complexity and increased inefficiency.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Palm oil</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Coverage</strong></td>
<td>Supply chain</td>
</tr>
<tr>
<td><strong>Main measure</strong></td>
<td>Other, please specify (greater value chain alignment)</td>
</tr>
<tr>
<td><strong>Comment</strong></td>
<td>support and adhere to proven sector initiatives, systems and formats and DO NOT reinvent the wheel as currently is happening with deforestation monitoring systems:</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Soy</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Coverage</strong></td>
<td>Supply chain</td>
</tr>
<tr>
<td><strong>Main measure</strong></td>
<td>Improved data collection and quality</td>
</tr>
<tr>
<td><strong>Comment</strong></td>
<td>enhance data for indirect suppliers, currently being engaged for monitoring activities</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Soy</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Coverage</strong></td>
<td>Direct operations</td>
</tr>
<tr>
<td><strong>Main measure</strong></td>
<td>Greater stakeholder engagement and collaboration</td>
</tr>
<tr>
<td><strong>Comment</strong></td>
<td>we need to create more engagement from stakeholders in our direct operations so proper incentives can be created to bring more suppliers into voluntary compliance</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Forest risk commodity</th>
<th>Soy</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Coverage</strong></td>
<td>Supply chain</td>
</tr>
<tr>
<td><strong>Other parts of the value chain</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Main measure</strong></td>
<td>Price premium for certified materials</td>
</tr>
<tr>
<td><strong>Comment</strong></td>
<td>customers need to recognize the value of certified materials and pay the premium as incentive to farmers. Currently, customers want certification as long as it is free. That is not engaging for it does not promote the distribution of added value.</td>
</tr>
</tbody>
</table>

SF2.1

(SF2.1) Please propose any mutually beneficial forests-related projects you could collaborate on with specific CDP supply chain members.

SF2.2

(SF2.2) Have requests or initiatives by CDP supply chain members prompted your organization to take organizational-level action to reduce or remove deforestation/forest degradation from your operations or your supply chain?

Yes

SF2.2a
(SF2.2a) Specify the requesting CDP supply chain member(s) that have driven organizational-level action to reduce or remove deforestation/forest degradation from your operations or your supply chain and provide details on how.

**Requesting member**
McDonald's Corporation

**Category of project**
Policy and commitments

**Type of project**
Make a public commitment

**Description of the project/initiative**
The customer has requested transparency in the commitment to fight deforestation in the value chain.

**Give an indication of the metric of success for the initiative**
Bunge has published a series of 10 progress report for soy and quarterly updates its efforts in the Palm sector. Indicators show success in the implementation of commitments.

**Would you be happy for CDP supply chain members to highlight this work in their external communication?**
Yes

---

SF3.1

(SF3.1) For your disclosed commodity(ies), do you estimate the GHG emission reductions and/or removals from land use and land use change that have occurred in your direct operations and/or supply chain?

**Palm oil**

**Estimate GHG emissions and removals from land use and land use change**
Yes, but not willing to share details

**Please explain**
our related data is available through our scope 3 analysis. The company has also studied emissions related to land use change and related reductions considering the implementation of our policies. Such is still considered sensitive information being analyzed.

**Soy**

**Estimate GHG emissions and removals from land use and land use change**
Yes, but not willing to share details

**Please explain**
our related data is available through our scope 3 analysis. The company has also studied emissions related to land use change and related reductions considering the implementation of our policies. Such is still considered sensitive information being analyzed.
