Bunge Announces Reporting Segment Changes

St. Louis, MO – April 27, 2021 – Bunge Limited (NYSE:BG) announced today that it has changed its segment reporting to align with the Company's new value chain operating structure.

Beginning with the first quarter 2021, Bunge will report Core Segment results as follows: Agribusiness, which includes processing and merchandising; Refined and Specialty Oils; and Milling. Bunge will also continue to report Corporate and Other results and Non-core Segment results, which is made up of Sugar & Bioenergy.

The primary changes are elimination of the fertilizer reporting segment, the results of which are now included in the processing component of the Agribusiness reporting segment, the realignment of grains and oilseeds operations into processing and merchandising, as well as other immaterial reclassifications between Core and Corporate and Other segments.

The segment reporting changes reflect a corresponding change in how the Company's Chief Executive Officer (its chief operating decision maker) reviews financial information in order to allocate resources and assess performance.

In conjunction with this change, certain prior year amounts have been recast to conform to the new segment reporting structure. These changes have no impact on previously-reported consolidated balance sheets, statements of income (loss), comprehensive income (loss), changes in equity or cash flows.

To illustrate the impact of the new segment reporting structure, the recast of certain financial information for the four quarters and fiscal year ended 2020, together with the corresponding financial information previously reported, accompanies this press release.

Definition and Reconciliation of Non-GAAP Measures

This press release contains certain “non-GAAP financial measures” as defined in Regulation G of the Securities Exchange Act of 1934. Bunge has reconciled these non-GAAP financial measures to the most directly comparable U.S. GAAP measures below. These measures may not be comparable to similarly titled measures used by other companies.

Total Segment EBIT and Adjusted Total Segment EBIT

Bunge uses segment earnings before interest and tax (“Segment EBIT”) to evaluate the operating performance of its individual segments. Segment EBIT excludes EBIT attributable to noncontrolling interests. Bunge also uses Core Segment EBIT, Non-Core Segment EBIT and Total Segment EBIT to evaluate the operating performance of Bunge’s Core reportable segments, Non-Core reportable segments, and Total reportable segments together with its corporate and other activities, respectively. Core Segment EBIT is the aggregate of the earnings before interest and taxes of each of Bunge’s Agribusiness, Refined and Specialty Oils, and Milling segments. Non-Core Segment EBIT is the earnings before interest and taxes of Bunge’s Sugar & Bioenergy segment. Total Segment EBIT is the aggregate of the earnings before interest and taxes of Bunge’s Core and Non-Core reportable segments, together with its corporate and other activities.

Adjusted Core Segment EBIT, Adjusted Non-Core Segment EBIT, and Adjusted Total Segment EBIT, are calculated by excluding temporary mark-to-market timing differences and certain gains and (charges) from Core Segment EBIT, Non-Core Segment EBIT, and Total Segment EBIT, respectively.

Core Segment EBIT, Non-Core Segment EBIT, Total Segment EBIT, Adjusted Core Segment EBIT, Adjusted Non-Core Segment EBIT, and Adjusted Total Segment EBIT are non-GAAP financial measures and are not intended to replace Net income (loss) attributable to Bunge, the most directly comparable U.S. GAAP financial measure. Bunge's management believes these non-GAAP measures are a useful measure of its reportable segments' operating profitability, since the measures allow for an evaluation of segment performance without regard to their financing methods or capital structure. For this reason, operating performance measures such as these non-GAAP measures are widely used by analysts and investors in Bunge's industries. These non-GAAP measures are not a measure of consolidated operating results under U.S. GAAP and should not be considered as an alternative to net income (loss) or any other measure of consolidated operating results under U.S. GAAP.

Below is a reconciliation of Net income attributable to Bunge to Total Segment EBIT, and Adjusted Total Segment EBIT, restated, for the four quarters and fiscal year ended 2020:
